

Autocar[®] Trucks

Severe-Duty Refuse Trucks

Engineered for Refuse. Designed for Severe-Duty. Custom-Built for You.

DC-64R™ Severe-Duty Conventional Refuse Truck

Not all trucks are created equal. That's why the DC-64R is custom-engineered to handle the extreme demands of your Refuse application. Developed from the ground-up, the DC™ comes from many years of severe-duty experience combined with the input of an advisory board of industry experts. By working with exclusive partners, Autocar delivers a fully integrated roll-off hoist direct from its factory. The DC-64R is an innovative solution to your problems and the best tool for the job.

Severe-Service Cab

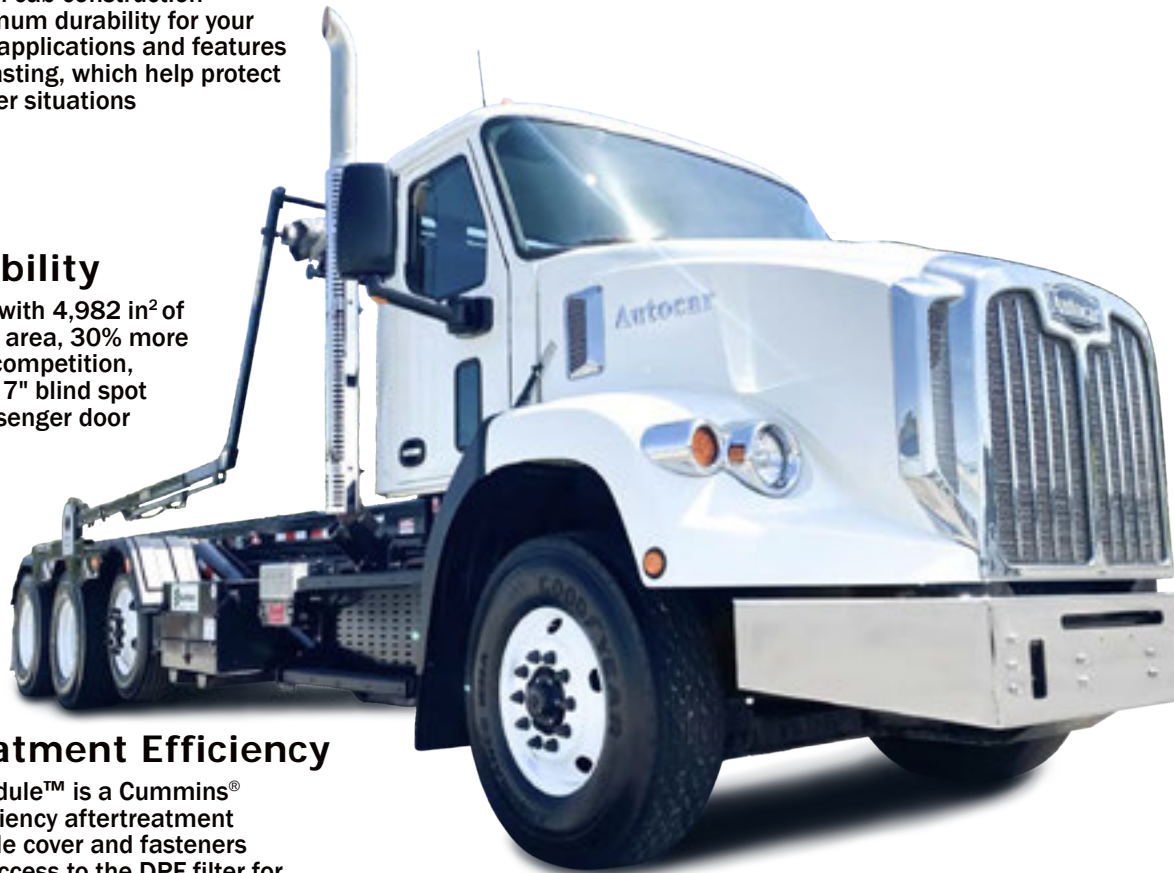

All-welded steel cab construction provides maximum durability for your severe-service applications and features solid A-pillar casting, which help protect driver in roll-over situations

325° Visibility

325° visibility with 4,982 in² of viewable glass area, 30% more than industry competition, optional 14" X 7" blind spot window in passenger door

Aftertreatment Efficiency

The Single Module™ is a Cummins® ultra-high efficiency aftertreatment system; a single cover and fasteners provide easy access to the DPF filter for replacement in minutes

ULTIMATE POWER OF ONE™

Through Autocar's engineering and design, it partnered with Galfab to deliver a fully integrated roll-off hoist direct from the Autocar factory; pusher and tag axles are factory mounted, factory-assembled increases quality, reliability, and uptime

Gas-Strut-Assisted Hood

Hood requires less than 10lbs. pull force to open because of coil springs and gas struts; built-in safety latch keeps hood secure while servicing engine

Cummins® Engines

Industry's best performance, low operating cost per mile, backed by the best service and parts network, Cummins engine options: X12, L9, ISX 12N
